

Sacajawea Audubon News

Sacajawea Audubon Society (SAS) builds on an interest in birds to promote the conservation of our natural environment through enjoyment, education, and action.

SAS Special Holiday Program & Membership Meeting: Monday, December 8

Bird Woman Legacy:

Preserving What is Threatened with Fortitude and Resolution

*Presented by Uschi Carpenter –
Nature, wildlife, and fine arts photographer*

We are thrilled to have Uschi Carpenter present our **special holiday program** December 8th at the **Emerson Center for Arts & Culture**. This enchanting program will weave together her beautiful images with her poetry as a tribute to Bird Woman i.e. Sacajawea and to our Montana birds, providing a call for conservation.

Join us at 6:00 PM for a fun filled Holiday Party. Enjoy refreshments, mingle with friends. Acquaint yourself with all the SAS programs that your membership, donations, and volunteer work has accomplished year after year. It is truly something to celebrate!

Uschi's program will premiere at 7:00 PM, in the Emerson's Crawford Theatre. **Please note that this program will not be recorded.** You have the opportunity to attend in person or virtually only. So don't miss this event!

Uschi has generously agreed to host a signing of her gorgeous 2026 calendars. **She will donate \$5.00 to SAS for each calendar sold during our event.** Don't miss this opportunity to purchase a beautiful gift that will also directly benefit our organization.

The December in-person meeting will be held Monday, December 8, 2025 at The Emerson Center For Arts & Culture, 111 South Grand Ave. A holiday social begins at 6:00 PM in the ballroom; the program begins at 7:00 PM. in the Crawford Theatre. A cash bar will be available.

For virtual attendance, please register at sacajaweaudubon.org/program. Attendees—whether in person or virtual—are encouraged to share their bird sightings at this and every monthly program.

SAS monthly programs are free and open to the public, featuring a special guest speaker the 2nd Monday of each month, September through May. For more information, contact Chris Nixon at programs@sacajaweaudubon.org.

Ursula "Uschi" Carpenter is a nature, wildlife, and fine arts photographer based in Missoula, Montana. Her photographs of birds have been called poignant and poetic. You may be familiar with Uschi's almost daily posts on the Montana Birding page on Facebook.

She received a Master's degree in German and English literature and linguistics from the University of the Saarland in Germany and studied at the University of Bradford in Great Britain and the University of California at Berkeley, California. Her careers in teaching and international relations took

her on a path from rural Montana to the upper political echelons of Washington, D.C. But it is in the art of capturing the beauty of the wild in both words and images that Uschi found her true calling. Her photography is said to carry a certain "gravitas", which is reflected in the poetry that is often paired with her images.

A MESSAGE *from* SAS PRESIDENT, CHRIS NIXON

Please join with other members and the community for our **December Holiday Program**. It is traditionally our largest and arguably most impressive gathering of the year. Special thanks to our volunteer event coordinator Brooke Everest for dreaming up this special holiday program and SAS Showcase!

This year our celebration and presentation will be held at the **Emerson Center for Arts and Culture - Monday, December 8th. Gather at 6:00 PM** in the ballroom for hors d'oeuvres and drinks / open bar. Tables will be set up displaying all the programs and activities your membership, volunteer hours, and financial donations make possible. Door prize entries will be earned by visiting each display - so make sure you allow time to make the rounds. It will be a wonderful time to celebrate our organizations collective accomplishments and on-going work.

At 7:00 PM, we'll assemble in the Crawford Theatre for a heartfelt multi-media presentation by Montana photographer Uschi Carpenter. **NOTE: This program will NOT BE RECORDED.** You have the opportunity to attend in person or virtually (live), so don't miss this event! *See page 1* for more information.

Following Uschi's presentation, there will be drawings for **door prizes** and our **annual raffle** of two **Bridger Bowl season passes**. Special thanks to Bridger Bowl for their generous donation. Proceeds from the raffle help fund the **Bridger Raptor Count**. *See page 5* to learn how you can purchase raffle tickets before the limited number (500) runs out.

Our **Motus Towers** are going up! In a single year, this project has become our 3rd largest project (financially) of all time. At our celebration, there will be tables covering all the facets of our largest program, **Indreland Audubon Wetland Preserve**, including the Motus project. These displays will provide a quick study on everything wetland related here in Bozeman. We plan to break ground on the wetland restoration fall of 2026. **We need your continued support through donations RESTRICTED to the Indreland Wetland Restoration** to move this project across the finish line and open it to the public. **Please be GENEROUS!**

Stop by other tables to sign up for the **Spring Master Naturalist Class**, and the upcoming **Christmas Bird Counts**.

This, our final gathering of the year, will be a great opportunity to **renew your annual memberships** both with the **Sacajawea Audubon Society** and **National Audubon Society**.

We look forward to seeing you all there!!

BIRD NOTES

.....by John Parker

With the mild weather continuing well into November, it has been an interesting fall migration with a number of unusual birds moving through this area. I can't recall another time when there were so many uncommon or rare birds in such a short time. Meanwhile many of the expected birds, such as waterfowl, were slow to arrive from the north.

During this period, the first bird of note was the **Red-throated Loon** that the October 18 Sacajawea Audubon Society Ennis Lake field trip participants spotted on their arrival at the Meadow Lake fishing access. With Ennis Lake being one of the premier staging areas for **Common Loon** in Western Montana, it's also arguably the best spot to search for other not so common loons. This same group also found two **Say's Phoebes** along the north shore of Ennis Lake. Hands down, this is the latest fall record for Say's Phoebe in our area of Montana.

Meanwhile, on that same day Mary Keck discovered a **Northern Parula** in her north Bozeman yard. This warbler did not stray too far from its favorite birch tree during the three days it was in the neighborhood, giving many others the chance to see a bird that has only been seen about thirty previous times in Montana. Incredibly, a second Northern Parula was spotted by Paulette Epple in Mike and Stephanie Becker's yard near Harrison on November 12th, making it the latest fall record for Montana. Not as rare but still a nice find locally, was the

Tennessee Warbler that visited Lou Ann Harris' northwest Bozeman yard from October 29th till November 2nd.

Lou Ann also discovered the nearly famous **Cattle Egret**, sometimes known as "Carl", on October 21st in the field just west of the Bozeman Post Office on Baxter Lane. This egret stayed in the same vicinity for almost three weeks, foraging along a short strip of the North 19th Street corridor. Long staying and

Cattle Egret "Carl" made a lengthy stay in the field just west of Bozeman's Baxter Lane Post Office. Photo by Ed Harper.

highly visible, it was possible to observe the egret at length and see what opportunistic feeders Cattle Egrets are (several people saw it eat voles, along with numerous invertebrates). Being one of the world's most adaptable birds, Cattle Egrets are remarkable for their amazing range expansion over the last 150 years.

Originally a southwest Asian species, it now inhabits every continent except for Antarctica. Cattle Egrets first reached the western hemisphere in the late 1800's, North America by the 1950's, and Montana in 1974. This particular bird is Gallatin County's second record.

A Scissor-tailed Flycatcher spotted by Josiah Kiehl, was the first recorded appearance in Gallatin County. Photo by John Parker.

The wonders kept coming. On October 26th, while walking his dog in the northwestern corner of Three Forks, Josiah Kiehl discovered a **Scissor-tailed Flycatcher**. The core range of this spectacular flycatcher is in Texas and Oklahoma, though

they are somewhat prone to wandering. This was the Scissor-tailed Flycatcher's first appearance in Gallatin County, though another one was seen less than two miles away across the Jefferson River in Broadwater Co. in 2001. In 2020 another Scissor-tailed Flycatcher was seen along Brackett Creek Road in Park Co.

Rounding out this fall's surprises, was a **White-eyed Vireo** that John Parker found foraging in the willows next to Cattail Pond in northwest Bozeman, on October 31st. This cooperative vireo, often within 10-15 feet of the sidewalk, was last seen the morning of November 2nd. The White-eyed Vireo is not especially known for vagrancy, and this wanderer was only the

A White-eyed Vireo, spotted in northwest Bozeman, is a rare vagrant to be spotted in this area. Photo by Ian van Collier.

fifth Montana state record. Not an uncommon bird in the south and eastern parts of the U.S., by this time of year it should have been well on its way to its wintering grounds in the region around the Gulf of Mexico and the Caribbean Basin.

AUDUBON
SOCIETY

INDRELAND AUDUBON WETLAND PRESERVE UPDATE: DECEMBER 2025

THE WETLAND PRESERVATION PROJECT (WPP) was initiated to accomplish Sacajawea Audubon Society's mission to protect and restore increasingly rare wetland and riparian habitats in our region, and to provide educational opportunities and enjoyment for generations to come.

Exceptional Stewardship Activity Advances Our Vision and Goals

In 2025, the Indreland Audubon Wetland Preserve experienced a year of exceptional stewardship activity that advanced our vision and goals. Our urban wetland continues to serve as an accessible environmental study area for learners of all ages, providing hands-on education in wetland ecology. Our vision remains to document the effects of human influence on wetland communities and to inspire the conservation, restoration, and enhancement of wetlands throughout our region.

The Indreland Audubon Wetland Preserve Board of Directors has been working diligently to finalize restoration planning and to advance the Sacajawea Wetland Mitigation Bank. The summary below provides an overview of recent progress in restoration design, anticipated construction time-frames, and the proposed mitigation bank.

Wetland Restoration Planning and Design

Recent Accomplishments

- The Indreland Audubon Wetland Preserve Board worked corroboratively with the City of Bozeman and the Montana Department of Transportation (MDT) to finalize plans for temporary construction access for the restoration and enhancement of the site.
- A big focus, in 2025, was coordinating with adjacent landowners to establish additional land buffers around the Preserve. These buffers will support long-term wetland protection and may ultimately be incorporated into a broader site management framework.
- The US Army Corps of Engineers has approved the mitigation bank prospectus as of November. The next step in this process is the submission of a draft mitigation instrument, which is planned for December. This approval is a significant milestone that lays the groundwork for wetland mitigation in the Gallatin Watershed.
- The Indreland Board is actively progressing on the preliminary design for trails, wildlife viewing blinds and other visitor features aiming to create an educational environment while ensuring safety for all people and wildlife within the Preserve.

Sandhill Crane and Canada Geese enjoying an autumn day in the Indreland Audubon Wetland Preserve.

Current Restoration Challenges

- An on-site visit, in 2025, by the Burlington Northern Santa Fe (BNSF) engineer responsible for design review has helped to advance the associated lease-related agreements. Current challenges involve completing the Mitigation Bank with the Army Corps of Engineers and the associated permits.

We are moving forward with preliminary designs with how people will access the wetland without impacting the animals and ecology.

Giving Tuesday 2025

Thank you for remembering our wildlife neighbors on December 2nd!

Giving Tuesday is a day that encourages people to do good as part of a global movement unleashing the power of radical generosity. Join Sacajawea Audubon Society in celebrating this global day of generosity and philanthropy by making a gift today! Your gift helps us continue to protect our local Greater Yellowstone Ecosystem natural environment for wildlife and people.

BRIDGER RAPTOR MIGRATION COUNT 2025 PRELIMINARY REPORT

The 34th consecutive, full-season count of southbound migrating raptors atop the Bridger Mountains began on August 27th and was completed on October 31st. A

total of 2,950 migrating raptors of 17 species were recorded in **410.4 hours of observation**,

for a season-long average of 720 raptors per 100 hours. Remarkably, **Golden Eagles** yielded the highest count, with a total of 1,401 individuals tallied (340/100 hrs.).

The species with the second highest count was the **Sharp-shinned Hawk**, with a total of

487 sharpies (120/100 hrs.). **Cooper's Hawks** were third in abundance, with 389 individuals (95/100 hrs.). A complete list of the total count for each of the 22 migrating raptor species tallied for 2025 is shown in below.

The 2025 season experienced an exceptional Golden Eagle flight on October 8-10 and again on October 17-18. Photo by Nick Bolgiano.

Turkey Vulture	23	Unknown Accipitrine	33
Golden Eagle	1401	Broad-winged Hawk	51
Osprey	2	Unknown Buteo	11
American Kestrel	149	Red-tailed Hawk	163
Bald Eagle	46	Unknown Falcon	8
Merlin	15	Rough-legged Hawk	22
Northern Harrier	70	Unknown Eagle	5
Peregrine Falcon	15	Swainson's Hawk	12
Sharp-shinned Hawk.....	487	Unknown Raptor	11
Cooper's Hawk	389	Ferruginous Hawk.....	10
Prairie Falcon	19		
American Goshawk	8	TOTAL	2950

The exceptional Golden Eagle flight was highlighted by especially high numbers on the October 8th (148), 9th (290) 10th (108) 17th (183) and 18th (120), for a grand total of 849 in five days!

We wish to thank our stalwart primary counters for their consistent hard work throughout the season. **Isabel Masi, Oskar Robinson** and **Ruby Neatherlin** each did an exceptional job searching the skies, counting and recording every individual migrant throughout the 2025 fall count season! A great many other observers assisted with the count throughout the 2025 season. Hawkwatch will provide a complete list of volunteer observers in the final report, which will be available on Sacajawea Audubon Society's website upon completion. Watch for this to be posted by mid-January.

SUPPORT THE BRIDGER MOUNTAIN RAPTOR PROJECT

Enter to Win One of Two Bridger Bowl Season Ski Passes!

Sacajawea Audubon Society's important Bridger Mountain Raptor Project is entering its 34th year, and your support is more crucial than ever. To ensure the continuation of this vital monitoring program, we're excited to raffle off two Bridger Bowl Ski Area season passes, valued at \$1230 each.

The data collected from this survey is essential for tracking population trends of Golden Eagles and other raptors, helping to shape conservation efforts. **The funds raised from this raffle will cover approximately one-quarter of the project's \$20,000 budget.**

Tickets are just \$10 each, or you can get 6 for \$50!

Every ticket you purchase helps us better understand and safeguard the future of these majestic birds.

Get your raffle tickets today and support the ongoing work of the Bridger Mountain Raptor Project!

A big thank you to Bridger Bowl Ski Area for their continued support of the Bridger Mountain Raptor Project.

Purchase raffle tickets at SAS program meetings and SAS Wildlife Trivia Nights at the Lockhorn Cider House, or request tickets online by scanning the QR code.

Two Winners will be drawn on December 8th, 2025 at the SAS Holiday Program at the Emerson Center for Arts and Culture.

December Wildlife Trivia Night with Sacajawea Audubon Society

JOIN US on Tuesday, Dec 16

Lockhorn Cider House – 21 S Wallace, Bozeman

PARTICIPATE IN THE 2025 CHRISTMAS BIRD COUNT

Come and join in on the fun during one of our area's Christmas Bird Counts. The Christmas bird counts are an opportunity for beginning-to-expert birders to get together for the day, and share this holiday tradition. If you are unable to join a count for the entire day, another option for participation is to be a feeder watcher. Please contact the compiler in your area if you would like to be a feeder watcher for one of the counts.

For more information, contact your area's count compiler. As a courtesy, please make contact in advance of your scheduled count day. This will allow them the opportunity to plan and organize for the best outcome. **Participation is free.**

RENEW OR JOIN SAS TODAY– MAKE 2026 OUR BEST YEAR YET!

For more than 50 years, Sacajawea Audubon Society has embraced the mission of protecting birds and the places they need here in the Greater Yellowstone Ecosystem of Montana. Your membership and additional gifts fund a well-integrated program of science, local advocacy, environmental education, and places to enjoy nature. Your support makes it possible for us to stand up locally for birds and other wildlife and to defend a healthy habitat, and stable climate they—and we all—need.

Even if you belong to the National Audubon Society (NAS), we need your support through a local Sacajawea Audubon Society (SAS) Membership. **As an SAS member, you'll enjoy the benefits of a member while knowing that your annual dues are used locally, for conservation right here in your own backyard.**

SAS Local Membership gives you many benefits:

- **Protect** one of the last remaining large, nearly intact ecosystems in the northern temperate zone.
- **Enhance** bird-friendly communities in Montana with our bird-friendly landscape program.

- **Contribute** to important environmental education programs about birds, wildlife and habitat.
- **Connect** with vital partnerships between other nonprofit environmental groups, citizens and local governments.
- **Advocate** for environmental issues locally and regionally.
- **Participate** in activities at the Indreland Audubon Wetland Preserve environmental study area.

SAS Members Enjoy:

- **Free** monthly keynote speaker meetings.
- **Free** birding hotspots guide. Info on birding around the Gallatin Valley & beyond
- **Free** monthly member e-newsletter (published 9 times a year).
- **Member-only discounts** on education, programs and events.
- **Savings** on purchases and access to member-only sales.
- **Participation** in many citizen science projects.
- **Free** guided birding field trips.

Renew your membership for 2026 by filling out the membership form below or, join online at:

sacajaweaudubon.org/for-members

Thank You To Those Who Have Renewed Your Annual SAS Local Membership!
